QUALIFICATION OF A RALLY

A candidate rally may qualify for the Championship only if it has been organised the year preceding its inclusion in the Championship or in the year of championship as approved by the FMSCI and if the reports drawn up by the Delegates appointed by the FMSCI have been satisfactory,

In case organisers do not qualify to the conditions as stated above, the FMSCI may approve an event in to the INRC Calendar subject to the minimum following key officials being appointed with prior approval by the Rallycom

Clerk of the Course
Deputy Clerk of the Course
Chief Safety Officer
Secretary of the Meet
Stage Commanders
Competitors Relation Officer
Service Park Incharge
Results Coordinator
Communication Coordinator

CANCELLATION OF A CHAMPIONSHIP RALLY

Any Championship rally which is cancelled will not be entered in the Championship in subsequent years, except in a case of force majeure as recognized by the FMSCI.

REPORTS

For each rally, a report will be drawn up by an FMSCI Observer and possibly by other FMSCI officials, and reviewed by the relevant FMSCI Commission.

Any Championship rally shown by the Observer report to have failed either to comply with the regulations or to attain an adequate standard against the points observed may not be accepted in further years in the Championship.

CANDIDATE RALLIES

Any rally which is a candidate for FMSCI Championship must comply with the General Prescription applicable to FMSCI rally Championship and to the sporting regulations of the championship concerned. In case of candidate event, Organiser would have to run a one Leg rally of regular INRC event, where criteria like safety, communication, organization etc. would be looked at. If the Organisers are known and have run an INRC event in past three years, the criteria would be different than that of a new Organiser as decided by the Rally Committee. It is further clarified that in new venues (outside the home state of the organiser) and/or for new organisers (not run an INRC in the past three years), there should be a contender event duly observed and / or must comply with the specific conditions as stated above before allotting a round of INRC.

- 44.3 TIME CONTROL FOLLOWED BY A SPECIAL STAGE**
When a time control is followed by a start control for a special stage, the following procedure shall be applied:

- 44.3.1** At the time control at the finish of a road section, the appropriate marshal will enter on the time card both the check-in time of the crew and its provisional stage start time. There must be a 3-minute gap to allow the crew to prepare for the stage start and come to the start line.
- 44.3.2** If two or more crews check in on the same minute, their provisional start times for that special stage shall be in the order of their relative arrival times at the preceding time control. If the arrival times at the preceding time control are the same, then the times at the time control previous to that one will be taken into account, and so on.
- 44.3.3** Having checked in at the time control, the competing car shall be driven to the start control of the special stage from where the crews will start the special stage according to the procedure laid down in these regulations.
- 44.3.4** If there is a difference between the provisional and actual start times, the time entered by the marshal at the start of the special stage shall be binding, unless the Stewards decide otherwise.
- 44.3.5** The stage start time shall then be the start time for the following road section.

45. MAXIMUM PERMITTED LATENESS

45.1 MAXIMUM PERMITTED LATENESS

Any lateness exceeding 15 minutes of any individual target time or an accumulative lateness exceeding 30 minutes at the end of each section or of a Leg of the rally will result in the competitor concerned being considered to have retired at that control and the total penalty accrued for late arrival as per Art. 44.2.10.a) shall be that for 30 minutes lateness. . The crew may nevertheless re-start the rally under the provisions specified for the relevant Championship, if applicable. In calculating such lateness, the actual time and not the penalty time (10 seconds per minute) applies.

45.2 EARLY ARRIVAL

Early arrival shall under no circumstances permit crews to reduce the lateness.

45.3 NOTIFICATION OF LATENESS

Disqualification for exceeding the maximum permitted lateness under Article 45.1 may only be announced at the end of a section.

46. REGROUPING CONTROLS

46.1 PROCEDURE AT ENTRY TO A REGROUP

46.1.1 On arrival at regrouping controls, crews will receive instructions concerning their starting time. They must then drive their car immediately and directly to the Parc Fermé where engines must be stopped and the crew must leave the Parc Fermé.

46.1.2 All crews must be prepared to be present for up to 5 minutes in an autograph zone, organised adjacent to the TC and accessible to public.

46.2 PROCEDURE AT THE EXIT FROM A REGROUP

Except after an overnight regroup and before the start of the Power Stage (if applicable), the cars shall restart in the order of arrival at the regroup. However, for any reason, the Clerk of the Course may, with the knowledge of the Stewards, order any car to be repositioned.

SPECIAL STAGES

47. SPECIAL STAGES GENERAL

47.1 TIMING

For special stages, timing will be to the second. However, timing to the tenth of a second is permitted for all rallies counting towards a Championship.

48. SPECIAL STAGE START

48.1 START POINT

Special stages commence from a standing start, with the car placed on the starting line.

48.2 START PROCEDURE

48.2.1 The electronic start procedure shall be clearly visible to the crew from the start line and may be displayed as either a countdown clock and/or a sequential light system. In either case the system must be described in the rally supplementary regulations.

48.2.2 There must be a permanent start line (also on gravel and snow) and the jump start photocell should be 50 cm after the start line.

48.2.3 After the actual start time has been written on the time card, the time card should be given back to the crew as soon as possible.

48.2.4 When the car arrives at the start line, the front of the car should be positioned behind a stick placed by the marshal to define the exact start position. One minute before the

start time, but not before the car has stopped in its exact position, the marshal shall remove the stick and the crew shall refer to the automatic countdown clock. Any subsequent change of the car's position until its start time is not permitted and will be reported to the stewards.

48.3 MANUAL START PROCEDURE

In the event of having to use a manual start procedure after handing the time card back to the crew, the start marshal will count down aloud: 30" - 15" - 10" and the last five seconds one by one. When the last 5 seconds have elapsed, the starting signal shall be given.

48.4 DELAYED START THROUGH FAULT OF CREW

48.4.1 In the event of a start delayed through a fault of the crew, the marshal will enter a new time on the time card, the penalty then being 1 minute per minute or fraction of a minute late.

48.4.2 Any crew refusing to start in a special stage at the time allocated to it will be reported to the Stewards, whether the special stage is run or not.

48.4.3 Any car not starting from the start line within 20 seconds after the start signal will be considered as retired and immediately moved to a safe place. This car will be allowed to re-start on the next day as per Art. 54 of these Regulations.

48.5 DELAY OF A SPECIAL STAGE

If there is no start of a competing car for more than 20 minutes, the spectators must be advised that the stage is about to recommence with the passage of a safety car. Alternatively the stage shall be stopped

48.6 FALSE START

A false start, particularly one made before the signal has been given, will be penalized as follows:

1st offence: 10 seconds.

2nd offence: 1 minute.

3rd offence: 3 minutes.

Further offences: at the Stewards' discretion.

These penalties do not prevent the Stewards from imposing heavier penalties if they judge it necessary. For time calculations actual start time must be used.

49. SPECIAL STAGE FINISH

49.1 FINISH LINE

Special stages must end in a flying finish which should be located at a point where cars can be expected to go slower and at least at 200 m before the stop line. The area between the Flying Finish and the stop line should be free from bends, sharp or deceptive corners, or hazards such as gates or any dangerous obstacles. Stopping between the yellow warning sign and the stop sign is forbidden and will be reported to the Stewards. Timing will be recorded at the finish line, using electronic beams, and be backed up by stopwatches. The timekeepers must be positioned level with the finish line, indicated by the sign bearing a chequered flag on a red background.

49.2 STOP POINT

The crew must report to the stop point indicated by a red "STOP" sign to have its finishing time entered on the time card (hour, minute, second, and when applicable tenth of a second). If the timekeepers cannot give the exact finishing time to the marshals immediately, the latter may only stamp the crew's time card and the time will be entered at the next regrouping control.

50. POWER STAGE

Not Applicable.

51. SUPER SPECIAL STAGES

51.1 CHARACTERISTICS OF A SUPER SPECIAL STAGE

51.1.1 When more than one car starts at the same time, the track design at each starting point must be similar. The same starting procedure must apply to each car. It is permitted to stagger the starting line for the cars to equalise the length of the stage from the different starting positions.

51.1.2 The inclusion of a super special stage in the rally itinerary is optional.

51.2 RUNNING OF A SUPER SPECIAL STAGE

The specific regulations regarding the running, starting order and time intervals of a super special stage are entirely at the discretion of the organiser. However, this information must be included in the supplementary regulations of the rally.

51.3 SAFETY

51.3.1 A system of Red Flags deployed by marshals or Red Lights must be positioned to signal competitors to stop or slow. Article 53.5.

51.3.2 To ensure safety, the car of a competitor who fails to complete the stage may be transported by the organisers to the end of the stage or to a safe location for evacuation.

52. INTERRUPTION OF A SPECIAL STAGE

52.1 When a special stage is interrupted or stopped for any reason, each crew affected will be allocated by the clerk of course a time which is judged the fairest. A corresponding notification will be published by the Clerk of the Course. However, no crew which is solely or jointly responsible for stopping a stage may benefit from this measure.

52.2 If a crew/vehicle is substantially and evidently hindered by a car in front, the Clerk of the Course may give a time credit (notional time).

53. COMPETITOR SAFETY

53.1 EQUIPMENT OF THE CREWS

Whenever a car is in motion on a special stage, the crew must wear minimum FIA Approved crash helmets, all required safety clothing and equipment in compliance with Appendix L Chapter III - Drivers' Equipment and have their safety belts fastened. Any infringement will be penalized by the Stewards.

53.2 EQUIPMENT OF THE CARS

53.2.1 In case a Safety Emergency console (Tracking System) is provided by the organiser, the system must be easily accessible for the driver and co-driver when seated with their harnesses fastened.

53.2.2 SOS / OK SIGNS

Each competing car shall carry a laminated red "SOS" sign and on the reverse a green "OK" sign measuring at least 42 cm X 29.7 cm (A3). The sign must be placed in the car and be readily accessible for both drivers.

53.2.3 Each competing car must carry a red reflective triangle.

53.3 INCIDENT ON A SPECIAL STAGE

53.3.1 In the case of an accident where urgent medical attention is required, the following applies

- The SOS switch on the emergency console must be activated as soon as possible (if applicable)
- When possible the red "SOS" sign should be immediately displayed to the following cars and to any helicopter attempting to assist.
- The red reflective triangle must be placed in a conspicuous position on the same side of the road as the car by the member of the crew at least 50 meters before the car's position, in order to ward following drivers even if the car is off the road.

53.3.2 Any crew which has the red "SOS" sign displayed to them, or which sees a car which has suffered an accident where both crew members are seen inside or outside the car, shall immediately and without exception stop to render assistance unless they see the OK sign. All following cars shall also stop. The second car at the scene shall proceed to inform the next radio point. Subsequent cars shall leave a clear route for emergency vehicles. All crews stopped by this procedure will receive a suitable time according to Art 52.

53.3.3 In the case of an accident where immediate medical intervention is not required or of a car stopping for any other reason on or beside a special stage, whether temporarily or permanently, the following applies

- -The OK switch on the emergency console must be activated within one minute (if applicable)
- -The Green "OK" sign must be immediately be displayed to the following cars and to any helicopter attempting to assist.

If the crew leaves the vehicle, the "OK" sign must be displayed so that it is clearly visible to all following crews.

53.3.4 Should the emergency console display show the SOS, the OK or Hazard signal, then this signal is the equivalent to the display of the SOS/OK board or the red reflective triangle

53.3.5 Should it not be possible, for whatever reason, to display the OK/SOS board in any of the above situations, this may be replaced by an evident and clearly understandable sign language shown by the crew outside of the car:

- an arm and thumb up to indicate "OK"
- crossed arms above the head to indicate "SOS".

53.3.6 Any crew which is able but fails to comply with the above rules will be reported by the clerk of the course to the stewards.

53.3.7 The road book shall contain a page giving the accident procedure.

53.3.8 Any crew retiring from a rally must report such final retirement to the organisers as soon as possible, save in a case of force majeure. Any crew failing to comply will be subject to a penalty at the Stewards' discretion.

53.4 INCIDENT ON A SPECIAL STAGE INVOLVING A PERSON WHO IS NOT A CREW MEMBER
If a crew is involved in an accident in which a member of the public sustains physical injury, the car must stop immediately, and the procedure as laid down in Article 53.3.1 must be followed.

53.5 USE OF RED FLAGS

53.5.1 ELECTRONIC RED FLAGS (IF APPLICABLE)

Electronic red flags will be used in all competing cars. When activated from rally control, the screen of the Emergency Console will turn red and show the message "RED FLAG". Crews must immediately confirm the electronic Red Flag by pressing the button "ACKNOWLEDGE" and proceed as specified in Art. 53.5.3.

53.5.2 RED FLAGS AT RADIO POINTS

The Red Flag will be displayed to crews only on the instruction of the clerk of the course. The flags may only be displayed at radio points marked in the road book and by a marshal wearing a distinctive jacket of the colour stipulated in Appendix III, Article 1.5 and on which is marked the radio point symbol. Flags will be displayed at all radio points preceding the incident. A Red Flag must be available at each stage radio point (situated at approximately 5 km intervals). No flag other than the Red Flag may be deployed at any point in a special stage.

53.5.3 MEANINGS OF A RED FLAG

On passing a displayed Red Flag and/or receiving an electronic Red Flag, whichever happens first,, the driver must immediately reduce speed, maintain this reduced speed until the end of the special stage, and follow the instructions of any marshals or intervention car drivers. Failure to comply with this rule will entail a penalty at the discretion of the Stewards.

53.5.4 A crew which has been shown the Red Flag will be given a notional time for the stage as stated in Art. 52.

53.5.5 If different signalling systems (e.g. flashing lights) are used in super special stages, full details must be included in the supplementary regulations.

53.5.6 If a stage is interrupted or stopped and the crews are required to pass through the special stage, a Red Flag must be displayed at the start to inform the drivers how they must proceed.

53.5.7 RED FLAG POINTS DURING RECONNAISSANCE

During reconnaissance, a sign bearing the radio post symbol must be displayed at the location of each radio point. This sign may be smaller than that used in the rally but must be clearly visible to crews performing reconnaissance in order that the locations may be noted.

53.6 CHICANE

53.6.1 A chicane may be set up to address a situation related to safety. Competitors must negotiate a succession of artificial curves designed to reduce their speed.

53.6.2 Any chicane must be mentioned in the draft Safety Dossier and in the road book. It must be implemented according to Appendix H-5.5.7.1 to the Code and with the signs defined in Appendix I. Signage and marks showing the complete position of the chicane elements must be put in place before the beginning of reconnaissance.

53.6.3 A Judge of Fact must be placed at the chicane to report any infringements, constituted by the displacement of at least one of the elements of the chicane. Each infringement will be penalised by 10 seconds.

53.7 VIRTUAL CHICANE (VC)

53.7.1 A Virtual Chicane may be set up to address a situation related to safety, when the implementation of a chicane as per Art. 53.6 would bring additional hazard to the special

stage. Competitors must then briefly reduce their speed below 50 km/h (or as specified in the Supplementary Regulations), within a defined zone of 150 to 250 metres.

53.7.2 Any Virtual Chicane must be mentioned in the draft Safety Dossier and in the road book. It must be implemented with the signs defined in Appendix I. Signage must be put in place before the beginning of reconnaissance.

53.7.3 The organiser must get the written confirmation from the safety tracking system provider that the coverage is sufficient to monitor competitors' compliance with the Virtual Chicane. The console in competition vehicles must be designed to visually confirm to the crew that a speed of less than 50 km/h (or as specified in the Supplementary Regulations) has been recorded in the VC and that they can re-accelerate.

53.7.4 A Judge of Fact equipped with a speed measurement device must be placed in the VC to carry out additional checks. In the event of discrepancies in the checks, the lowest speed will be considered.

53.7.5 Any excess speed in the VC will be penalised as follows:

1 to 5 kph: 10 seconds

6 to 10 kph: 20 seconds

11 kph and over: 1 minute

53.8 SLOW ZONE (SZ)

53.8.1 A Slow Zone may be established to address an exceptional situation related to public safety. Competitors must then maintain their speed below the maximum speed set for the whole of the Slow Zone.

53.8.2 Any Slow Zone must be mentioned in the draft Safety Dossier and in the road book. It must be implemented with the signs defined in Appendix I. Signage must be put in place before the beginning of reconnaissance.

53.8.3 The organiser must get the written confirmation from the safety tracking system provider that the coverage is sufficient to monitor the permanent evolution of the competitors in the SZ.

53.8.4 It must be between 500 and 1000 metres long. The maximum speed in the Slow Zone may be 30, 50 or 70 km/h.

53.8.5 It is strongly recommended that a backup system (timing cells or time-stamped cameras) measures the time spent by a competitor in the SZ, in the event of a malfunction of the safety tracking system.

53.8.6 Competitors' speed is recorded every 100 metres. Any excess speed will be penalised as follows:

From 1 to 5 kph: 10 seconds per record

6 to 10 kph: 20 seconds per record

11 kph and over: 1 minute per record

54. RE-START AFTER RETIREMENT

54.1 GENERAL

54.1.1 Unless stated differently in the rally Supplementary Regulations, a crew which has failed to complete a section may be assumed to re-start the rally from the start of the next section following the overnight regroup unless they confirm otherwise with the Clerk of the Course by completing of the form located in the rear of the road book ('final retirement') and lodging it with the organiser as soon as possible and, if feasible, before the publication of the re-start list.

54.1.2 After the Clerk of the Course has been informed of a retirement, the crew must hand in their time card. When retirement is on a special stage or at a stop control, that stage time will not be recorded and Art. 54.2 shall be applied.

54.1.3 In the case of exceeding the maximum permitted lateness under Art. 45 of these regulations, the competitor concerned will be allowed to re-start after the next overnight regroup. The time penalty will be applied as per Art. 54.2 from the TC at which the competitor concerned has exceeded the maximum permitted lateness.

54.1.4 Any crew which has retired from a section on the last day of the rally will not be classified.

54.1.5 Any crew which deliberately retires with the perceived intention of gaining an advantage will be judged by the Stewards, who may not permit the crew to re-start. The Stewards may apply sanctions against the Competitor and/or crew concerned in accordance with Article 11.9 of the Code.

54.2 PENALTIES

54.2.1 For all crews which re-start a time penalty will be applied. For every stage missed, this time penalty will be 10 minutes and for Super Special Stage it will be 3 minutes

54.2.2 This time penalty will be added to the fastest time of any driver for each missed stage, which shall include the special stage or super special stage on which the crew has retired.

54.2.3 Should retirement occur after the last special stage or super special stage before an overnight regroup, the crew will nonetheless be deemed to have retired on that last special stage or super special stage.

If a crew such affected has set the fastest time of its class on that last stage, its own time will be taken into consideration for the application of the time penalty.

55. REPAIRS PRIOR TO A RE-START

55.1 SERVICE LOCATION AND TIME ALLOWED

Any car which fails to finish a Leg in accordance with the above may be repaired at the competitor's discretion. However, the car must report to the overnight regroup prior to the next Leg, no later than 1 hour before the scheduled start of the first car.

NOTES

* Allow for extra time in road section for any TV presentation at end of stage.

** % = the percentage of the total distance of special stages.

A table as above should conclude the final itinerary page.

Appendix II – 5 ROAD BOOK

1. GENERAL REQUIREMENTS

- The Road book must be distributed according to the FMSCI General Prescriptions.
- There may be one book for the entire rally or a different book for each Leg. If a different daily book is used, there should be an obvious method of distinguishing it.
- The road book shall be A5 size and bound on the left hand side with metal or other strong binding capable of 360° opening.
- Printing should be double sided with paper of 90 gsm or greater
- Printing shall be on white paper. There is no requirement to use colour to distinguish between special stages and road sections, this being achieved by shading of direction column (see example)
- The time allowed for each section shall be expressed in hours and minutes.
- There shall be no more than six instructions per page (In case of six instructions per page header shall be smaller as in the example)
- All road book pages shall be numbered to have the possibility of checking the completeness of the book.

2. FIRST PAGES

- Road book shall contain a page giving accident procedure and :
 - List of Hospitals / medical centers
 - Telephone numbers of rally HQ and emergency services
- A page of all the symbols used must appear in the front of road book.
- Instructions for trip meter calibration may be included.
- The itinerary in portrait format and maps (including a scale and direction North) for the entire rally must appear in each road book. It is recommended that the page with the itinerary of particular leg appears opposite the corresponding Leg map

3. INSTRUCTION PAGES

- When a rally route is duplicated (i.e. 2 identical loops) organisers are encouraged to economise by printing one common set of route instructions. In this case, each page heading must include the different TC's, stage and section numbers. If there is any variation between two passages, there should be no common set of route instructions.
- Each road book should include at least one service park plan. Repeated plans of service park layouts for each visit are not necessary. However, plans are important when there is change of TC locations.
- Layout plans of Remote Service, Tyre and / or Light fitting zones and Remote Refuel points should be included. (if applicable)
- Inclusion of route instructions for shakedown, 'return to start' loop (if any) and road sections from/to the service park, are recommended.

- A new page is required for the start of each road section or special stage. A new page from the stop point after a special stage is not necessary, this being a continuation on the same road section (see example).
- When the partial distance between two junctions is less than 200 meters, the horizontal line between the boxes is not needed EXCEPT between TC and SS start (see example).
- Individual stage maps shall include:
 - A scale
 - The direction North
 - Reconnaissance route
 - Alternative route
 - Location of start/finish and all emergency vehicle points.
- The GPS location of the start and finish of each special stage and of the regroupings and service parks must be shown. This shall be expressed in the form of degrees, minutes AND DECIMALS of minutes i.e.: 139° 36.379’.
- Photographs or diagrams of control locations may be included.
- The number of the special stage shall be placed on the side of the page (see example) to enable easy location of the stage. When printing is double-sided this number should be the outside edge i.e. opposite the bound edge of the page. The number should appear only on pages relating to the special stage.
- All intermediate emergency vehicle and ambulance points must be indicated by the appropriate symbols.
- Road numbers shall be included where relevant.
- A variation in the thickness of the direction arrow should be used to indicate a major / minor road, not the direction to be taken.
- The thick vertical line between the “Direction” and “Information” columns shall be in-filled in black where the road surface is gravel and left blank (white) where the surface is tarmac or sealed.
- The distance between TC and SS start must be placed in the information box (see example)

4 FINAL PAGES

- Alternative routes may be included as a section at the end of the road book on a paper with different colour.
- Other requirements:
 - Final Retirement form
 - Enquiry form

5 CHANGES

In case of a change in road book (e.g. with a bulletin) not only the changed indication boxes have to be shown but also the last and the first valid indication boxes have to be printed with their numbers. The changed pages should be issued in A5 to be inserted into the road book.

6 OTHER USEFUL INFORMATION

- A trip meter point on long junction drawings, such as roundabouts, is recommended.

- On road sections, the junctions to or from another SS should be identified and oncoming rally traffic should be mentioned.
- A competitor's time record page
- Advice of the partial distance to the next junction at the base of each page (especially when junctions are in rapid succession).

Appendix II – 6 : Standard FMSCI Time Cards

GENERAL

- A separate time card must be issued at least for each section of each Leg.
- The target time for covering the distance of a road section must appear on the time card.
- Hours and minutes must always be shown as: 00.01 - 24.00, only the minutes which have elapsed will be counted.
- Time cards should be issued and collected at the end of each section. Used time cards then become available for the results teams to check. Ideally a separate new card should be used for end of Leg 45' service (as in example for 'Flexi-Service B'). This allows 'dead time' in the pre- service holding park for any technical checks.
- An organiser may propose to the FMSCI the use of an Electronic Time Card in place of a written system. The use of such a system must be approved by the FMSCI before use.

DESIGN

- See following sample.
- Centre column is for completion by officials and right hand column for completion by competitors.
- Previous Car No is optional. It is used by several rallies for safety checking. If this box is used it should be placed under the 'provisional start time' box.
- Size: 9.9 cm x 21 cm (to print 3 time cards from an A4 sheet) or 11 cm x 18.5 cm
- Boxes size: 1 cm
- The card should be at least 300gsm card or 270µm polyester paper (for poor weather conditions). Note that polyester paper, although waterproof, cannot be easily folded. An alternative is to produce a time card with cover – i.e. a card of 22 x 18.5 cm folded, that has a cover to protect the written area.
- When many TC's are involved, reverse side printing or use of a side by side (and folded inwards) design may be used.
- The printing colour is free. For example, an organiser may use a sponsor's colour, or a different colour for each section or simply grey and black.

- 2.2.2 Special stages should be situated and scheduled to discourage movement of spectators between them.
- 2.2.3 Reconnaissance by crews is considered a safety factor.
- 2.2.4 Should a special stage be delayed or cancelled for safety reasons this will not be penalized in the observers' report (unless due to problems created by, or not properly anticipated by, the Organisers).
- 2.2.5 Cars (referred to as course information cars) equipped with public address systems must traverse each stage approximately one hour before the road closure cars (zero cars) to warn spectators and ensure that any who are in prohibited areas are removed from those areas. This operation may be repeated several times if necessary.

2.3 Control of Spectators

2.4 Re-fueling and Servicing

Where the public is permitted access to areas where refueling or servicing will take place, the Organisers must ensure that adequate precautions are taken to keep the public at a suitable distance from potentially dangerous activities.

Adequate fire extinguishers should be placed at the service parks and a fire tender should be present if the service park has a refueling area.

2.5 Accident Reporting

If a driver taking part in a rally is involved in an accident in which a member of the public sustains physical injury, the driver concerned must report this to the next radio point as specified in the road book and signposted on the route according to Article 3.3.3 below. If he fails to observe this rule, the Stewards may impose on the crew responsible, a penalty which may go as far as disqualification. The laws of the country must also be complied with in relation to procedures at accidents. (This rule must be included in the regulations of the event).

2.6 Accident investigations

Any accident involving a fatality or serious injury must be the subject of a report to the FMSCI Rally Commission. This report is to be prepared by a committee consisting of the Organiser/Club appointed Steward of the event, the Chief Scrutineer, the Chief Safety Officer, the Chief Medical Officer and, where possible, a representative of the police or similar authority. The report should reach the FMSCI no more than 30 days after the conclusion of the event except where legal or other protocols prohibit.

No driver who has retired from the rally may drive a course car. The clerk of the course should take note of the recommendations of the zero car drivers in order to ensure that a special stage is cancelled if dangerous conditions exist. Zero cars should also check time clocks and have time cards correctly completed.
- 2.7.4 “Course Information Cars” equipped with public address systems must traverse all special stages approximately 45 minutes to 1 hour before the start of the first car to warn spectators and ensure that any who are in dangerous places are removed from those areas. The operation may be repeated several times if necessary.
- 2.7.5 Each Organiser must use a course-opening car (Sweeper Car) to pass through each special stage after the last competitor. These cars must carry a panel as detailed in Article 2.7.2 showing a chequered flag.

2.8 Safety on Road Sections

The itinerary and time schedule must take traffic problems and the crossing of built-up areas into consideration.

2.9 Information

Information addressed mainly to the public will be issued by different means;

- written, spoken and televised media
